USE OF PLACE

Original Use: River Current Use:

River

Ownership:

Public Access: Yes Occupied: Not Occupied

DESCRIPTION

Walls: Not applicable Roof: Not applicable

Condition: Poor Integrity:

Original fabric: **Modifications:**

The Greenough River forms an integral part of the Greenough landscape, most noticeably along the Front Flats and at the river mouth. The mainly dry river has a number of pools, including Bootenal Spring [Place No. 6], but closer to the river mouth forms into a picturesque watercourse which is home to a wide variety of water birds and estuarine vegetation. Except when the river is in flood, a sand bank forms a barrier between the Greenough River and the Indian Ocean. The Greenough River mouth is a popular recreational area for fishermen, water skiers, 4 wheel drivers and picnickers

HISTORY

Construction Date: Not Source:

applicable

Architect: Not available **Builder:** Not available

The Greenough River was discovered by Lt. George Grey in 1839 during his overland trek to the Swan River Colony after being shipwrecked at Gantheume Bay. The river is named after George Greenough, President of the Royal Geographic Society. The Greenough River has flooded on a number of occasions, most notably in 1888 which caused considerable damage to buildings, disastrous crop losses and some loss of life. Levy banks have been formed to prevent widespread flooding of the Front

HISTORIC THEMES

HCWA: 105 Exploration and surveying

605 Famous and infamous people

AHC: 3.1 Exploring the coastline

3.3.4 Looking for land with agricultural potential

3.11.1 Regulating waterways

STATEMENT OF SIGNIFICANCE

The Greenough River has considerable historic significance for its association with early exploration of the area, in particular Lt George Grey's 1839 expedition, as well as early contact between settlers and Aborigines. The flooding of the Greenough River has had an enormous impact on the development of the Greenough Flats. The place also has high aesthetic significance, given the attractive setting and range of flora and fauna which exists there. The river is held in high esteem by the local community and provides for a popular recreational destination.

MANAGEMENT CATEGORY

Management Category: 3

Level of Significance: MODERATE SIGNIFICANCE: Important to the

heritage of the locality.

ManagementConservation of the place is recommended.Recommendation:Any proposed change to the place should not

unduly impact on the heritage values of the place and should retain significant fabric

wherever feasible.
