FOGO Update

Great news. As more of our valued FOGOers are getting into the groove of FOGOing, our bin presentations are now up from 55% to 57%, and even better news, contamination rates have dropped from 5% down to an even more digestible level of 3%. So, if you can't reach round far enough to pat yourself on the back, ask your partner or a mate to, because you all deserve it.

Mark's making plans

Mark from Drummonds has great plans on what he will be using his bag of compost for and will be lining up to buy more from the Bower Bird when the next load arrives.

Top guns lend a hand

Our CEO Ross and Mayor Shane Van Styn couldn't volunteer quick enough when we asked for some extra muscle to distribute the very first bags of complementary FOGO compost. This is the final step of the FOGO cycle and we hope you enjoy the ongoing rewards from separating your FOGO to spreading this gorgeous final product around your home's garden and flower beds. We would love to hear some stories of what you used it for.

WIN a \$100 Buy Local Greater Geraldton Gift Card!

To help the FOGO program reduce paper and print costs we would like to send as many of our FOGOers as possible your monthly edition of "What's The FOGO" electronically. Just send your name, address, contact phone number and email address to neilc@cgg.wa.gov.au and you will be entered into the draw. Now there's an incentive!

Keep an eye out

To help prevent confusion around what bags are FOGO compatible and reduce our plastic contamination even further, we have been talking to your local supermarkets who have agreed to add a shelf talker to clearly point to the bag's shelf location. Check it out when next shopping for your FOGO compostable bags.
