

WHAT'S THE FOGO

FOGO TRIAL NEWSLETTER // SEPTEMBER 2022

FOGO
FOOD ORGANICS
GARDEN ORGANICS

Welcome to the first edition of *What's the FOGO* and congratulations on being a part of what's becoming a successful CGG FOGO trial in 2022! We're keen to generate a monthly newsletter for all our participants for a couple of good reasons. To give feedback on the trial progress and to include other interesting and informative articles about the recycling space and the waste reduction movement in general. Australia wide, FOGO is a very hot topic, where all states are gearing up and developing their FOGO supply to reduce landfill by a minimum of 65%. As you'll agree, this is a serious number and along with the massive reduction in methane gas it's not just a noble, but also an important step in helping our environment. We hope you enjoy receiving *What's the FOGO* and keep on FOGOing!

FOGO facts

Since the programme revitalisation in May 2022 we have reduced contamination from 45% to 5% and bin presentation is now well above 55% (Target of 75%)!

The Bowerbird turns one

The Bowerbird is an important part of the waste and landfill reduction movement and has just celebrated its first birthday. Based in Landfill Lane, its friendly team Nat, Corryne and Raye are ready to take any items that can be recycled and reused. Bowerbird's first year has saved over 50,000 items from landfill and welcomed over 16,770 customers... WOW! great job team Bowerbird!

No birthday celebration is complete without our Mayor Shane Van Styn, a cake (top) and a couple of the more unusual items saved from landfill (bottom).

Bags of gorgeous FOGO compost coming to your door soon!

That's right, we will be receiving our first bags of FOGO compost shortly and to say a big thanks for your great work, we'll be delivering a bag to each household. Keep an eye out for the delivery by FOGO Bro's Fred and Neil.

Participant profile

Melissa from Sunset Beach says, "It's absolutely fantastic to not be wasting my food scraps and now can't wait to see the final product for my garden."
