

Holiday Accommodation Studio Unit – 15 Pinna Way, Sunset Beach

The application proposed that the existing ancillary accommodation building upon the property be converted for use of holiday accommodation.

Suitability of the Property

The Studio Unit has a small kitchenette with a microwave, fridge, air fryer, and sink. The guests can also have access to a BBQ outside upon request.

The unit has its own bathroom and toilet. Reverse cycle air conditioning. It is a large comfortable space.

Nothing physically needs to be changed to the building as it is already connected to water, mains power and sewerage systems and the unit has an electric hot water system. Both dwellings have solar panels.

The Glenfield Shopping Centre is a 6-minute walk from the property. Sunset Beach is a 11-minute walk from the property. Geraldton CBD with all the restaurants, shopping facilities are a 9-minute drive from the property.

Management of the Property

The amenity of adjoining/nearby land uses

The property comprises of two detached dwellings. House and Granny Flat. The granny flat will be the holiday home accommodation.

The accommodation is suitable for a maximum of 2 people per night. The granny flat is located at the rear of property. And will have minimal impact on neighbours.

There is adequate parking on the property to allow for additional vehicles which won't impact on neighbours.

The operation and cleaning of the holiday accommodation will be undertaken by the owners who live onsite in the main dwelling.

The holiday accommodation will be advertised online through websites such as AirBNB and Booking.com. Guests will be met onsite and shown to their accommodation and given a run through of the facilities and emergency evacuation procedures. If the owners are unable to be there at the time of check in, the key will be made available by use of a locked key box. The unit will have clear signs within the dwelling of emergency evacuation procedures and manager telephone contact details.

Check in/out procedures should happen during the day and won't cause any noise impact. The guests will be provided with House Rules and a Property Guide, which will

include details on the limits of visitor's numbers and times, to reduce both noise and vehicle number impact.

Management of property on a day-to-day basis

Check in/out instructions are sent within the booking system. The manager will try to greet each guest when they check in. If the manager is unable to greet the guest, the key will be supplied via a locked box. The code will be supplied to the guest on the day of their arrival.

The manager/owner resides on site so is readily available for on-site assistance, though processes and systems will be setup to reduce the contact guests need to have with the manager, unless desired.

If the owners of the property are going to be away, they will not make the property available for use. They will block out that time on the websites.

If an unpredicted situation occurs and the owners are unavailable. Another suitable Manager will be engaged casually to manage anything required physically in person. The guests will be provided with the casual Managers contact details.

Cleaning will occur on the day of check-out, coordinated by the manager.

Waste management is not expected to be an issue, with the small size of the dwelling. Disposal will occur through the main residence's waste system including the use of local recycling options.

Parking on the Property

There is a parking spot available at the front of the main house dwelling for guest. There is additional parking available at the rear of the property in the main driveway for additional vehicles, boats, or trailers; meaning no vehicles will be left on the verge or on the street.

Management of noise impacts of visitors

Guests will be proved with House Rules including no pets, events/parties and noise cut off times (9pm weeknights, 10pm weekend nights).

Residing on the same property, the manager will be aware of any breach of noise issues likely before they become a complaint. If a complaint occurs, the manager will be able to quickly attend in person or contact the guest via phone.

Through the booking system the manager will have direct communication with guests to rectify anything if the manager is not on the property. Through rating-based sites, guests will endeavour to act in their best interests and behaviour to avoid bad reviews.

Relevant site-specific matters

The accommodation is equipped with a smoke detector. Signage has been installed inside the unit with emergency evacuation instructions. A fire blanket is provided in the kitchen.

A property guide is provided to guests prior to arrival outlining practical details of the property, appliances etc. including a detailed map on how to access the holiday home.

A sign will be erected with the managers name and contact details once approval has been received, and these details will be readily available inside the property as well.
