1. Introduction

1.1. Summary

The purpose of this document is to present the City's 2018-19 Capital Program, which comprises:

- \$53.4 million New Capital Program
- \$19.2 million Asset Renewal Program

The City has applied the funding profiles within the City's Long Term Financial Plan when preparing both the Asset Renewal Program and New Capital Program, as well as taking into account anticipated external contributions such as government grants. The Capital Program is contingent on confirmation of funding profiles.

1.2. New Capital Program

The New Capital Program contains \$53.4 million to plan, design and construct brand new projects or to upgrade existing assets.

The New Capital Program includes the carryover of the following projects which were committed to in the previous financial year, being:

- \$1.9M Animal Management Facility
- \$1.6M Geraldton-Greenough SES Facility
- \$5.9M Beresford Foreshore Stage 2
- \$24.0M Airport Runway Project

The New Capital Program has also being developed with the anticipation that grant funding applications submitted for the following projects are successful:

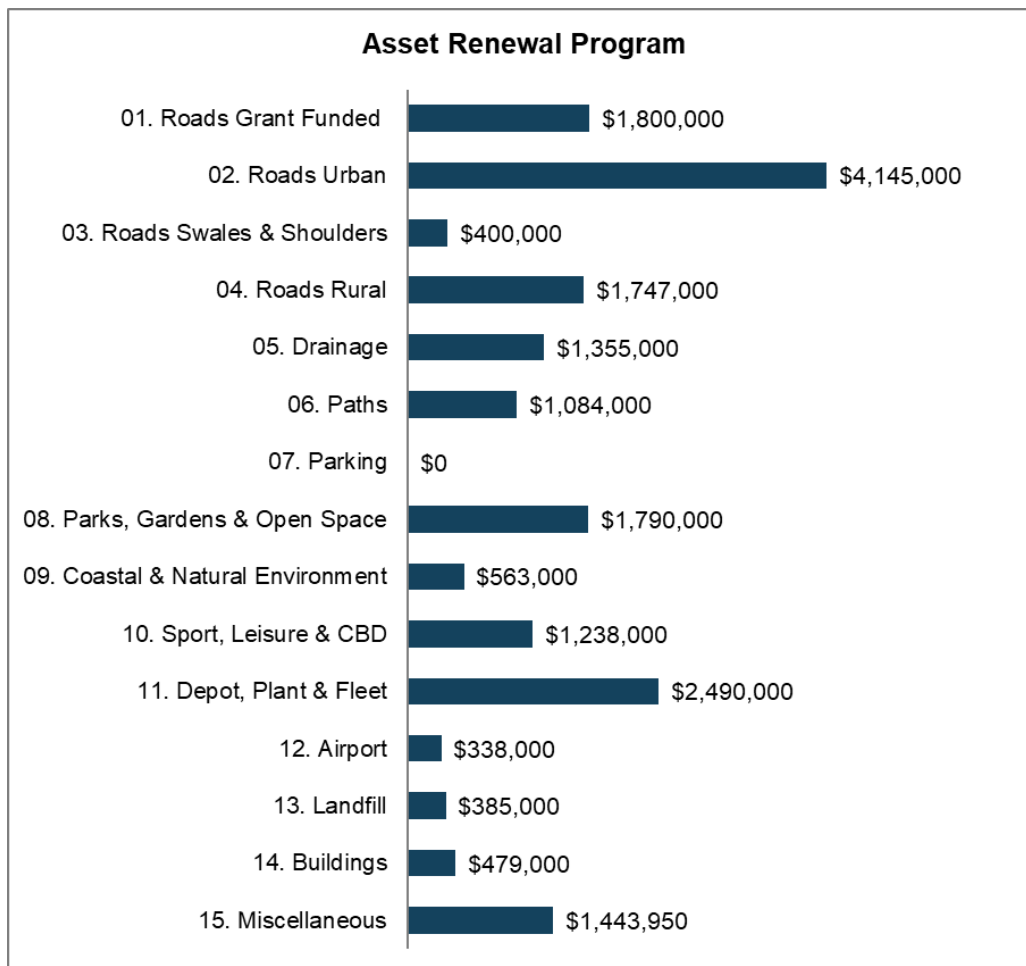

- \$11.6M Advancement of the Midwest Regional Resource Recovery Facility (Includes BBRF amount of \$4.6M)
- \$24.0M Airport Runway Project (Includes BBRF amount of \$10M)

1.3. Asset Renewal Program

The Asset Renewal Program contains a total of \$19.25 million to renew existing assets.

The City has a large portfolio of community assets under its control which forms an integral part of providing services to the community. These assets include roads, drainage, paths, bridges, lights, buildings, airport, plant & fleet, coastal infrastructure, parks and open space recreational assets. The replacement cost of our assets is in the order of \$1 billion dollars, with the annual budget allocation associated with renewal of these assets forming a large part of the City’s Capital Program.

The following figure summarises expenditure at a portfolio level.
