

Australia's
broadband
network
bring it on

Get excited, Greater Geraldton

All the possibilities of the
nbn[™] network are now
within reach.

Welcome
the internet
that'll shape
Greater
Geraldton's
future

Get fast internet on Australia's new broadband network[†]

The **nbn**[™] network is designed to give Australian businesses and homes access to fast, reliable phone and internet services for decades to come. And now it's on your doorstep. That means you can say goodbye to constant drop outs and buffering and say hello to exciting opportunities.[†]

Questions? Speak to a service provider
Or visit nbn.com.au for more information

[†]Your experience, including the speeds actually achieved over the **nbn**[™] network, depends on the technology over which services are delivered to your premises and some factors outside our control (like your equipment quality, software, broadband plans and how your service provider designs its network).

Your questions answered

■ Is it true my phone and internet could stop working if I don't do anything?

Yes. That's why we recommend you switch affected home and business services now and avoid possible disconnection.*

■ When should I switch?

To avoid any last-minute rush to connect and the risk of a break in your landline phone or internet service, we recommend you switch as soon as the **nbn**[™] network is available in your area.*

■ How much will it cost?

A standard installation of **nbn**[™] equipment is currently free of charge – but remember to ask your provider if they will charge any other fees.

*Services provided over the **nbn**[™] network will be replacing phone and internet services provided over most of the existing landline networks, including copper and the majority of HFC networks within the fixed line footprint. Services provided over existing fibre networks (including in-building, health and education networks) and some special and business services may not be affected. To find out if your services will be affected, please contact your current phone or internet provider. For more information, visit nbnco.com.au/switchoff or call 1800 687 626.

Here's what to do next

① Check if your place is ready to connect

Checking whether the **nbn™** network is good to go at your home or business is easy. Just type in your address at **nbn.com.au/greatergeraldton** or call **nbn** on **1800 687 626**, 9am - 5pm (AEST), Monday - Friday.

② If you're all set to connect...

Contact a phone or internet provider and ask about switching your phone or internet to the **nbn™** network with a plan that suits your needs.

③ If you can't connect yet...

Register for email updates at **nbn.com.au/greatergeraldton** and we'll let you know as soon as it's time to switch.

Business owner?

Here are some frequently asked questions.

■ How do I switch?

You won't automatically be connected to the **nbn**™ network. When the **nbn**™ network is available at your premises, contact a phone or internet service provider and ask to switch to the **nbn**™ network. They'll help you choose the right plan for your business, based on your data use and the speeds you require.*

■ Could other business services be affected?

Yes, other business services that you may need to switch to the **nbn**™ network include ATMs and EFTPOS machines, emergency lift phones, monitored fire and security alarm systems, fax machines and TTY devices. For more information, contact your equipment provider (such as the bank that provides your EFTPOS machine).

■ Are there any business plans on the **nbn**™ network?

Yes. Speak to your phone or internet provider about the best plan or bundle for the amount of data you use and the internet speed you require.
