

Growing Greater Geraldton, TOGETHER

An overview of the City's Budget 2026/27

Building a healthy, connected and resilient community is at the heart of the City of Greater Geraldton's 2026/27 Budget, with strong investment in essential infrastructure, community facilities and safety.

This year's Budget delivers practical outcomes that support wellbeing, improve liveability and ensure our assets remain safe, functional and fit for the future.

Key projects include upgrades to the Geraldton Foreshore Youth Precinct, construction of new sewerage ponds at Meru Landfill and renewals across a range of sport and recreation facilities, alongside continued support for events and environmental initiatives.

Strengthening our transport connectivity continues to be a major focus, with considerable funding allocated to road, drainage and culvert works to improve safety, traffic flow and network longevity.

Despite ongoing cost pressures, the Council remains committed to responsible financial management, supporting local contractors and delivering on priorities aligned with the Connected, Liveable, Thriving and Leading themes of the City's Strategic Community Plan.
