

Mark Chadwick

Manager Environmental Health and Sustainability

City of Greater Geraldton

Good afternoon Mark

This note is in response to our discussion this morning relating to the City of Greater Geraldton becoming the provider of Municipal Services for the Kardaloo Community .

MEEDAC Inc are aware that the Federal Departments is moving towards local government being responsible for these services to the communities and we would believe that with the infrastructure available to the City of Greater Geraldton it would be a positive proposal for the Kardaloo community to have this service trialled at their site.

At this time a number of agencies provide services and if the City of Greater Geraldton were to administer and provide the Municipal Services and the provision of Power to the community it would reduce the cross referral situation and confusion.

MEEDAC Inc would support a trial of this nature with the Kardaloo Community

Yours Sincerely

Adrian Donovan

CEO

MEEDAC Incorporated
